PROFESSIONAL SUMMARY

Full-Stack ERP Engineer and Certified PMO Professional (PMP, PMI-PMOCP) with 15+ years of experience in enterprise system implementations, technical leadership, and AI-augmented development. Proven track record of delivering complex ERP projects on-time and on-budget across APAC and MENA regions. Combines deep technical expertise in Java, Spring Boot, React.js, AWS, and PostgreSQL with strong project governance and customer success capabilities.

EDUCATION

Master of Computer Applications (MCA), Anna University, Chennai, India – 2010

Bachelor of Science – Mathematics, Loyola College, Chennai, India – 2007

CERTIFICATIONS

PMO Certified Professional (PMI-PMOCP), Project Management Institute – 2025-2028

Project Management Professional (PMP), Project Management Institute – 2020-2029

EXPERIENCE

Independent ERP & Technology Consultant

Feb 2021 – Present

Self-Employed

Mauritius (Remote)

- Deliver end-to-end full-stack solutions across the entire technology stack: PostgreSQL/Aurora databases, Java/Spring Boot backends, React.js frontends, and AWS cloud infrastructure (EC2, S3, Lambda, IAM)
- Leverage AI-native IDEs (Cursor, Kiro, Antigravity) and terminal-based LLMs (Claude Code, Codex) for accelerated ERP customization, reducing development time for complex database functions, module configurations, and multi-file refactoring
- Utilized LLM tools to analyze and modify legacy PL/pgSQL functions (10,000+ lines) for Discounts & Promotions system enhancements; applied AI-assisted debugging across Java, PostgreSQL, and JavaScript stack
- Integrated LLM capabilities into Etendo ERP for intelligent product categorization, variant management, and automated QC inspection rules for DCI tank wash operations
- Provide strategic ERP consulting for enterprise clients including Sharaf DG, Al Rubaiyat Group, DCI (formerly Quala), and BUT (France); reduced bug rates by 30% through standardized development practices

Technical Director & Local Director

Oct 2014 – Feb 2021

KAILAO Consulting Ltd

Ebene, Mauritius

- Established and led PMO function for the Mauritius Development Center, implementing project governance frameworks, resource planning, and delivery standards across all client engagements
- Managed portfolio of 5+ concurrent ERP implementation projects using Agile/Scrum and PRINCE2 methodologies, achieving 98% on-time, on-budget delivery rate with 15% improvement in client satisfaction scores
- Scaled operations from concept to 15+ engineers while directing full P&L accountability, achieving 25% increase in client contribution margins through strategic resource allocation and project prioritization
- Spearheaded design and delivery of two strategic custom solutions: Mauritius-compliant Payroll System and Xero-Openbravo Connector, automating financial reporting and reducing manual reconciliation by 80%

Applications Engineer

Aug 2012 – Sep 2014

Openbravo

Bangalore, India

- Contributed to core product development of Openbravo ERP platform, directly impacting over 1,000 global enterprise deployments
- Designed and implemented significant platform features and architectural improvements that enhanced system scalability and stability, contributing to 20% reduction in critical support tickets
- Collaborated with cross-functional product and QA teams in Agile environment to deliver high-quality code for bi-weekly sprint releases

Senior Technical Consultant

Dec 2009 – Aug 2012

Fugo Consulting Pvt. Ltd.

Chennai, India

- Led full-lifecycle ERP implementation projects for clients, specializing in Supply Chain Management (SCM) and Quality Control modules that improved client inventory accuracy by up to 35%
- Developed complex regulatory TDS Management System, successfully deploying solution to over 4,000 hospitals across India and ensuring 100% compliance with national financial regulations
